A2 – Worksheet 2: A Day with Giraffes

A DAY WITH GIRAFFES

Giraffes are famous for their long necks and beautiful patterns. They live mainly in African savannas, where there are many trees and open areas.

A giraffe can use its long neck to reach leaves at the top of trees. It mainly eats leaves, especially from acacia trees. Giraffes spend many hours eating during the day.

Although giraffes look slow and gentle, they can run quite fast when they need to escape from danger. They usually live in groups, but the groups can change over time.

Exercise 1 – True or False

Giraffes live mainly in Africa. _____

Giraffes eat fish. _____

Their long necks help them reach leaves. _____

Giraffes can run fast when necessary. _____

Giraffes always stay in the same group. _____

Exercise 2 – Complete the sentences.

Giraffes are famous for their long _____.

They live in African _____.

They eat mainly _____.

They especially like _____ trees.

Giraffes can run fast to escape from _____.

Exercise 3 – Answer the questions.

Where do giraffes live?

Why is a giraffe's long neck useful?

What do giraffes eat?

When can giraffes run quickly?
