Reading worksheet

A2 – Worksheet 3: Dolphins in the Ocean

CLEVER SEA ANIMALS

Dolphins are intelligent sea animals that live in oceans around the world. They are famous for being friendly, playful and curious.

Dolphins usually live in groups called pods. They communicate with each other using different sounds and clicks. They also use sounds to find objects and other animals in the water.

Dolphins eat fish and other small sea animals. They are excellent swimmers and can jump out of the water. Young dolphins stay close to their mothers while they learn how to swim and find food.

Exercise 1 – Multiple Choice

Where do dolphins live?

- a) Forests
- b) Oceans
- c) Deserts
