Life on Green Farm (A2)

Green Farm is home to many animals and a busy family. Every morning, twelve-year-old Emma and her brother Jack help their parents before going to school. They believe that taking care of animals is an important responsibility.

Emma starts by feeding the chickens and collecting fresh eggs. Then she fills the water buckets for the sheep and goats. Jack cleans the rabbits' hutches and gives them fresh vegetables. After that, he helps his father brush the horses and check the fences around the fields.

In the afternoon, the family works together again. They collect hay, clean the barn, and make sure every animal has enough food and water for the night.

Although farm life is sometimes difficult, Emma and Jack enjoy working together. They learn to be responsible, kind, and patient. They know that happy animals need love, care, and attention every single day.

Exercise 1 – Choose the correct answer.

- | | |
|---|---|
| 1. How old is Emma? | 4. What do they collect in the afternoon? |
| ☐ 10 years old | ☐ Corn |
| ☐ 11 years old | ☐ Hay |
